

# Grosse Pointe South High School School Improvement Goals

- ◆ Each year, South H.S. selects school improvement goals based upon data from the previous year. Our School Improvement Team meets during the summer for a “data day” to assess our current needs.
- ◆ Our data results from 2009-10 were very good, providing documentation that we achieved goals selected the previous year.

# South High School 2009-10 Goals

## Goal #1

*"Increase student reading comprehension level on the Spring 2010 MME ELA test by 3%, while at the same time maintaining the pass rate on all other portions of the MME ELA test."*

A further explanation of this goal is "to increase student reading comprehension through the use of *transportable literacy strategies* across the disciplines to include summarizing, paired texts and vocabulary developments."

## Goal #2

*"To increase overall MME core content test scores by 3% for the 2009-10 school year through quality preparation for the tests."*

A further explanation of this goal is "to implement the use of the ACT format across all discipline areas on a continual basis. This format will be used on a variety of assessments, from 'bell work' to chapter tests."

## Goals for 2010-11

- ◆ The School Improvement Team selected three goals based upon data from 2009-10:
  1. **ELA** – Increase the passing rate on the writing portion of the Spring 2011 MME English Language Arts (ELA) test by 3%, including subgroup populations. The goal is to seek an increase from 76% to 79% in the overall passing rate.

## Goals for 2010-11 (cont.)

2. **Science**—Increase the passing rate on the science portion of the Spring 2011 MME Science test by 3%, including subgroup populations. The goal is to seek an increase from 82% to 85% in the overall passing rate.
3. **Math**—Increase the passing rate on the mathematics portion of the Spring 2011 MME Math test by 3%, including subgroup populations. The goal is to seek an increase from 82% to 85% in the overall passing rate.
