

For Your Information from our class

Hello Parents!

I'm Jodie Randazzo

and I am your child's fourth grade science teacher for magnets and electricity.

I live in Novi. When I'm at home I enjoy running, cooking, watching sports, but mostly, being with husband and our 6 month old son.

I am so excited to start this new unit. We will be changing classes 3 times a week for 45 min. I put projects, notes, and reviews on our class website, so while I won't send a weekly note home for your children, you are more than welcome to check our class website. The information for science will be the same for both classes. Units in Magnets and Electricity are force, making electrical connections, more advanced connections (parallel and series circuits), electromagnets, and the telegraph system.

In our classroom, we will promote a community atmosphere where everyone is a team player. Respect and cooperation are at the core of our community. Amazing things can happen when we all work together.

Now that you have had an opportunity to learn about me, please feel free to stop by our classroom anytime and introduce yourself.

Thank you so much,

Jodie
