

## EVERYDAY MATH

### Section 5

**Section 5 has a number of main areas of focus:**

- To introduce the need for standard measurement tools and units through continued measuring activities.
- To reinforce the use of multiple attributes to identify, describe, and sort objects.
- To reinforce the meanings of addition and subtraction number stories.
- To develop awareness of equivalent names for numbers.
- To introduce the concept of making exchanges.
- To introduce the class number grid.
- To introduce skip counting by 5's and tally marks.
- To reinforce and extend counting, estimation, and other numeration skills, and
- To continue patterning and graphing activities.
