

EVERYDAY MATH

Section 6

Section 6 has a number of main areas of focus:

- Introduce penny, nickel, dimes and coin exchanges
- Review of 2 and 3 dimensional shapes and symmetry
- Explore various ways to measure and compare time
- Extend graphing skills/ individual survey graphs
- Expand patterning skills to include representing patterns with symbols
- Introduce skip counting by 2's and continue other counting, estimating and numeration activities
- Introduce the concept of half
- Develop strategies for solving simple addition and subtraction problems, including joining, take away and comparison situations
- Continue measuring activities using standard and nonstandard tools and units
