

## ***Frankenstein* and Creation Annotated Bibliography**

Choose 4-5 articles on a controversial man-made creation or discovery that has had a significant impact on humanity. The articles may be about the creator, the creation, or the effect of the creation. Create works cited entries for each article following MLA guidelines.

Beneath each works cited entry, include a paragraph that briefly summarizes the article and evaluates its credibility.

After your entries, include an additional paragraph that discusses significant thematic connections between *Frankenstein* and your selected topic. Consider how your topic is similar to issues addressed in the novel.

Be sure all information is typed and double-spaced according to MLA guidelines.

### **Possible Topics:**

- Heliocentric model of the solar system (Galileo)
- Investigation of human cadavers (Andreas Vesalius)
- Theory of evolution (Charles Darwin)
- Theory of natural selection (Charles Darwin)
- DNA research (Rosalind Franklin)
- Atomic bomb (J. Robert Oppenheimer)
- Cloning (Harry Griffin)
- "Test tube baby" (Patrick Steptoe)
- Fetal stem cell research (Bryon Peterson)
- Electricity (Nikola Tesla)
- Organ transplantation (various)

There are many, many more possibilities. Check your ideas with me before beginning your research.
