

**ENCLOSURE: VI. F.**

**GROSSE POINTE PUBLIC SCHOOL SYSTEM  
TECHNOLOGY DEPARTMENT**

**AGENDA TITLE: VI. F.**

Classroom AV/Cabling

**BACKGROUND INFORMATION:**

In November 2018, voters passed a bond referendum which would allow the District to begin updating much needed classroom technology. One of those updates includes Classroom Audio/Visual Equipment and Cabling. Classroom Audio/Visual Equipment Includes:

- Interactive Flat Panels
- Document Cameras
- Audio and Sound Enhancement

After working with Plante Moran, the District Technology Cabinet, receiving feedback from teachers and administrators, the District is making the recommendation to award the Classroom Audio/Visual solution to VSC for \$1,208,903.06. This biggest portion of this project will upgrade all classroom SMART panels with SMART Interactive Flat Panels. These devices will allow teachers to not only utilize the SMART Learning Suite that our teachers are accustomed to, but will grant more opportunities for student collaboration due to an upgrade in new technologies.

The District is also recommending the structured cabling portion of the project be awarded to CIT for a total of \$184,751.67

**Request:** Board approval of Classroom AV Solution to VSC for \$1,208,903.06 and Structured Cabling to CIT for \$184,751.67
