Parents,

This week you received the [Yearly Water Report](#) from our district. Within the report, minimal levels of bacteria were found. To address these levels, all drinking fountains within the building have been turned off while a new hypochlorination system is put in place on all incoming water lines.

The installation of this system will not be able to happen before the end of the school year. To ensure students and staff have access to water, we have provided Culligan top loader water coolers throughout the building and we will be providing bottled water for anyone who needs it. Please remind students to bring in a refillable water bottle. Thank you.
